RE: Cover Variance, U.S. Pipe and Foundry, Facility Number 0306A,
Burlington Township, Burlington County

Dear Mr. Waxmonsky:

Your facility is registered to accept waste type #27, industrial waste. Recently, you requested to landfill the iron ore and slag generated at your plant without the placement of daily and intermediate cover. This office has received and reviewed the analyses of this material and has found it to be of a non-hazardous nature. Therefore, based on these results, your request to waive the daily and intermediate cover requirement is granted. During periodic inspections of your facility, we will evaluate your operation to ascertain whether or not the absence of daily and intermediate cover fully meets the goal and intent of our regulations with regard to the environment.

In addition, you are required to perform all landfilling operations in a systematic and staged format and when final elevations have been achieved as per the approved plan, final cover of at least two (2) feet of clean soil shall be placed on all areas.

Should you have any further questions, please contact Mr. Bruce Witkowski, of my staff, at (609) 292-7126.

Very truly yours,

Signed by Lino F. Pereira, Administrator
